

N.B: Top plates of tines will be drilled for four bolts to attach pillow blocks at points specified on dwg. AST-03-R10.

Top plates of tines are planed parallel to the base (datum A in AST-03-R06) to within  $\pm 0.0025$ . There will be four holes for bolts to attach pillow blocks which should be bored at this time (see AST-03-R10), and about 58 other threaded holes in the base to attach drive motors and other such accessories (see AST-03-R08, AST-03-R09, and AST-03-R10).
