J.A.E.	

Covers for 8 ports on side of mirror cell (tube). These cover connections for the lateral supports and hard points. All are to be made out of 0.063-inch aluminum plate. They are to be rolled to a cylindrical shape (axis parallel to the 13-inch dimension in these drawings) with a 48.5-inch inner radius. The attachment holes are 0.22 ± 0.01 in diameter.
